

Public Health Nursing Legacy Project

Purpose: To preserve and promote Florida's public health nursing history.

Goals/Objectives:

I. To recognize and appreciate the commitment of public health nurses.

- A. capture memories and recollections with oral histories
- B. link the project with FAPHN and elicit support for the project from the membership
- C. compile a database of public health nurses with notable contributions to the field.

II. To educate and inspire the future generation of public health nurses.

- A. disseminate information by presenting nursing histories at conferences, etc.
- B. write articles for publications in journals, newsletters, etc.
- C. Promote ongoing compilation of individual histories by interested public health nurses by providing a forum for publication and research assistance.

III. To preserve historical information about Florida nursing.

- A. locate, protect and preserve historical documents, artifacts, and memorabilia.
- B. establish a website and a virtual museum
- C. establish a physical location for an archival collection
- D. establish a biographical data base of public health nurses

Approved by FAPHN Board of Directors 3-20-08
